

Central Valley 511 Scoping

Michael Berman
ICx Transportation
August 12, 2008

Objectives

- Overall Project
 - Support Goals of Fog Detection Project
 - Leverage that Effort to Deploy Functional 511
- Today's Meeting
 - Review Responses to Scoping Questions
 - Get other Responses on the Table
 - Outline Process

Overall Process

Scoping Questions

- Information to be Included (including top 3 most important)
- Data Availability?
- Staff Availability?
- 511 Info Structure

Respondents

- Kings County COG
- Kern County COG
- Merced County Community Action Agency
(3 responses)
- Fresno COG
- San Joaquin COG

Highlights of Responses: Data

- Incident Info
- Traffic Speeds (and related info)
- Transit Schedules
- Weather/Fog

Other Key Responses

- Very little data available
- Most agencies able to devote some staff time
- No agreement over organizing principle of information on the phone
- Interest in CVO Information
- Interest in more global needs assessment

Discussion

- Anyone else want to respond to the questions?
- What are we missing?

Next Steps

- Digest today's meeting
- Draft Concept of Operations (9/05)
- Agency Review of ConOps (9/19)
- Draft Requirements (10/17)

Concept of Operations

- Purposes
 - Document what the 511 system is intended to do and how it will operate
 - Lead into requirements definition
- Contents
 - Current Situation
 - Reason for Changes
 - Concept for Proposed Changes
 - Operational Scenarios

Strawman ConOps

- 511 Telephone and Website
- Key Purpose: Provide Fog Information
- Also provide (to the extent available)
 - Incident information
 - Transit information
 - Construction information
 - Speed information (if infrastructure is installed)
- May be organized by county

Requirements

- Unambiguous written description of what system must do
- Will be used to guide development
- Testing will assure system meets requirements
